More About The SWCD Annual Tree Sale Program

Tree distribution dates: Trees will be available for pick-up in Baudette in early May. You will be notified approximately one month in advance for times, dates and location for pickup. Arrangements for cold, long-term storage must be made ***in advance***.

Quantities are limited, orders accepted until stock is depleted. Refunds only if desired trees are unavailable. Size may vary depending on nursery availability.

The SWCD is not responsible for tree survival or replacement. Due to the perishable nature of tree seedlings, we cannot guarantee survivability or replacement. Tree seedlings must be kept in a cool, moist environment until planted.

Shrubs/Small Trees	Growth Rate	Mature Height	Spacing Between trees x Between rows	Sun	Soils	Comments
Cherry, Nanking	Moderate	5-10 ft	3-8 ft x 10 ft	Full sun	Loamy soils, moist-dry soils	Edible fruit, good wildlife habitat, protection from deer and mice
Chokeberry, Black	Moderate	5-10 ft	3-8 ft x 10 ft	Full sun-partial shade	Sand-clay, moist-well drained soils	Good for pollinators and wildlife. Berries are edible. Suckers.
Chokecherry, Common	Fast	10-20 ft	3-8 ft x 10 ft	Full sun-partial shade	Sandy loam-silty clay, dry-wet soils	Good for pollinators and wildlife. Edible berries. Not heavily browsed.
Crabapple, Red Splendor	Fast	20-25 ft	3-8 ft x 12 ft	Full sun	Sandy loam-clay loam, dry-wet soils	Beautiful pink spring flower, fruit persists all winter, not palatable to humans.
Dogwood, Redosier	Fast	6-12 ft	3-8 ft x 10 ft	Full sun	Sand-clay, moist-wet soils	White berries, pretty red bark, can be pruned.
Elderberry	Fast	6-12 ft	3-8 ft x 10 ft	Full sun-shade	Sand-clay, dry-wet soils	Freely suckers, planted for wildlife. Not considered invasive but it suckers
Lilac, Common Purple	Medium	10-15 ft	3-8 ft x 10 ft	Full sun	Sandy loam-clay loam, moist-wet soils	Suckers freely, can be pruned, good for hedges, low wildlife rating
Plum, American	Moderate	10-15 ft	3-8 ft x 10 ft	Full sun	Loamy sand-silty clay, dry-wet soils	White flowers, edible plums, forms a thicket.
Juneberry (serviceberry)	Moderate	4-6 ft	3-8 ft x 10 ft	Full—partial sun	Sand to sandy clay, dry-wet soils	Sweet fruit good for eating and jelly. Makes a good hedge
Deciduous Trees						
Maple, Silver	Fast	60-80 ft	8-20 ft x 16 ft	Full—partial sun	Sandy loam-silty clay, moist-wet soils	Large, flood tolerant tree.
Oak, Bur	Slow	60-100 ft	8-20 ft x 16 ft	Partial shade	Sand-clay, dry-wet soils	Sturdy, long lasting tree, good for wildlife, will tolerate wetter site conditions.
Poplar, Siouxland	Fast	70-90 ft	8-20 ft x 16 ft	Full sun	Sandy loam-clay, dry-wet soils	Fast growing with a medium life expectancy, shallow rooted, seedless
Coniferous Trees						
Cedar, White	Slow	30-60 ft	6-10 ft x 16 ft	Full sun-partial shade	Sandy loam-clay, moist-wet soils	Also called Arborvitae, good wildlife habitat, needs to be protected from deer
Pine, Jack	Fast	50-65 ft	6-10 ft x 16 ft	Full sun	Sand-sandy loam, dry-moist soils	Used for shelterbelts and reforestation, native tree that can tolerate drought
Pine, Red (Norway)	Fast	75-100 ft	8-16 ft x 20 ft	Full-partial sun	Sand-silty clay, dry-moist soils	Does better in sandy loam sites. Salt intolerant. Deer browse is a moderate issue.
Pine, White	Fast	75-100 ft	8-16 ft x 20 ft	Full sun-partial shade	Loamy sand-clay loam, dry-moist soils	Excellent timber tree, soft needles, deer browse protection is a must, beautiful tree that's worth the effort.
Spruce, White	Moderate	50-75 ft	8-16 ft x 20 ft	Full sun-shade	Loam-clay, moist-wet soils	Windbreak tree, suits many sites.
Tamarack (Larch)	Fast	40-80 ft	6-10 ft x 16 ft	Full sun	Sand-clay, dry-wet soils	Beautiful fall color, fast grower and long lived.
